EDUCATION

University of Illinois Urbana-Champaign

May 2029

B.S. Computer Engineering | Champaign, IL

WORK EXPERIENCE

Revly (<https://revly.ca/>)

November 2025 – Present

Founder and Lead Engineer

Ontario, Canada

- Building a Canadian mobile marketplace connecting vehicle owners with local automotive service providers (detailing, roadside assistance, tire services) across Ontario.
- Architected full-stack mobile app from scratch: Flutter/Dart frontend, FastAPI backend, Supabase for database/auth/realtime, Stripe payments, and FCM push notifications.
- Stack: Flutter, Dart, Python, FastAPI, Supabase, Firebase, Stripe

Masongsong Engineering Ltd.

May 2026 – Present

Freelance Software Developer

Markham, ON

- Built a full-stack timesheet and progress-billing application from scratch to replace a firm's legacy Microsoft Access system, delivering 12 end-to-end feature phases across two milestones (timesheet entry, approval workflow, admin CRUD, invoice lifecycle, and financial reporting).
- Designed and implemented a progress-billing invoice engine supporting four cost-type calculations (fixed fee, upset limit, cost-of-work %, per-unit), with carry-over, cross-job "bill-with" aggregation, and a full create → finalize → PDF → correct lifecycle that reconciles to the dollar.
- Stack: Next.js 14, TypeScript, Supabase (Postgres + Auth + Storage + RLS), Prisma, Tailwind/shadcn, react-pdf, Vitest/Playwright, Vercel

LEADERSHIP & ACTIVITIES

Team Canada — RoboCup Soccer World Championships

July 2025

Lead Programmer

Salvador, Brazil

- Selected as 1 of 8 students nationwide to represent Canada at the RoboCup Soccer World Championships in Salvador, Brazil.
- Engineered autonomous IR-based ball detection and pursuit algorithms enabling real-time positional tracking and navigation without human input.
- Optimized loop logic, sensor polling, and redundant calculations to improve execution speed by ~40% and reduce memory usage by ~30%, meeting real-time performance requirements during competition.

PROJECTS

SO-101 Robotic Arm

2025 – Present

- Assembled and configured a 6-DOF robotic arm including hardware bring-up, WSL2 environment setup, and teleoperation.
- Trained an ACT (Action Chunking with Transformers) imitation learning model using the LeRobot framework on dual RTX 3080 GPUs.

Roblox Game Development

September 2022 – Present

- Designed and shipped multiple Lua-scripted games accumulating 40,000+ total plays and 100+ peak CCU across titles.
- Co-managed a competitive community of 200+ active players, organizing matches and live events.
